

TERMINAL STERILIZATION SYSTEM FOR
SUTURES

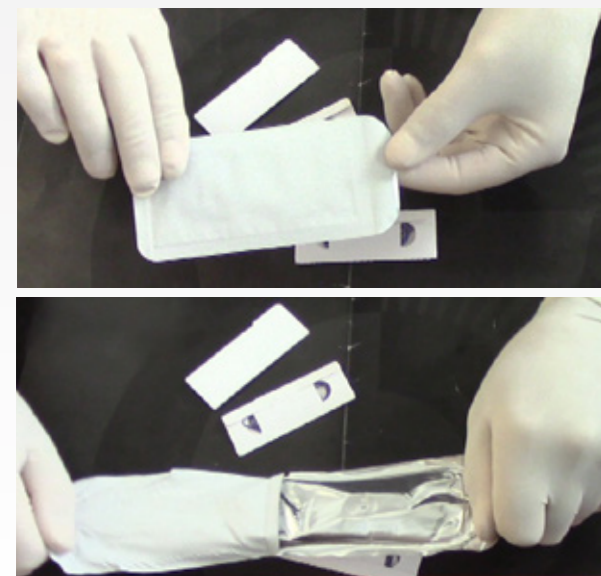

COLIMATIC TERMINAL STERILIZATION SYSTEM

THERMOFORMING LINE THERA 650

TERMINAL STERILIZATION SYSTEM

Coligroup, machinery supplier for the **suture packaging industry** since the early 80s, can undoubtedly be considered at the forefront of this application. As a matter of fact, the inner/outer traditional packaging for sutures, is being replaced by many leading companies, with our new coligroup **terminal sterilization system**.

As well as being a **better looking** and **more attractive kind of packaging**, thanks to its easy opening features (which allow the doctors to drop the suture straight on the sterile table, without touching any other surface) and because of its Tyvek Window System, this suture pack does not need any outer packaging, **granting massive savings on:**

- LESS PACKAGING – ENVIRONMENTALLY FRIENDLY
- SAVINGS ON FOIL & STERILIZATION
- SAVINGS ON LABOUR
- SAVE UP TO 35% ON TOTAL COST

BLANKING MACHINE

FINAL SEALING & CUTTING

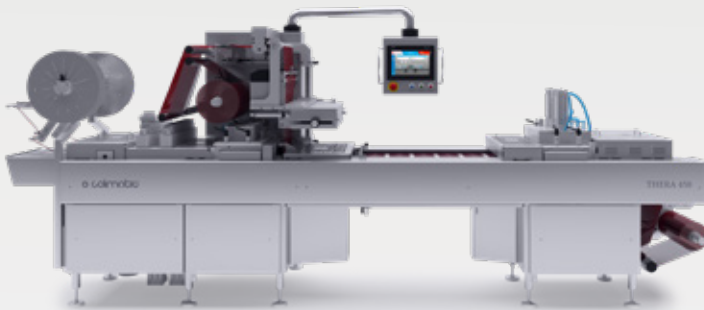

SPECIAL OPTIONAL FEATURES

- High-resolution **pin hole detection** system
- **Bar code reading** system (to reduce foils & films useless wastage)
- **Product presence** detection system
- **OCV-OCR** Vision Systems
- Innovative **printing solutions** on aluminum & medical papers
- Innovative semi automatic & robotic sutures **feeding systems**
- **CFR (Code of Federal Regulations) Title 21 Part 11**, unique and effective software tool, to ensure the traceability of electronic data, according to the guidelines issued by the FDA (Food and Drug Administration)
